PROFESSIONAL SUMMARY

QA Engineer / SDET with 4+ years in regulated software (FDA 21 CFR Part 11) and SaaS products. I design testing strategies and automation (Playwright, Jest, CI/CD) and work directly with the business to turn ambiguous requirements into clear acceptance criteria. I track and standardize QA processes end to end — from change control and validation documentation to sprint definitions of ready — so teams ship safely and consistently. Recent results: 800+ automated tests, 5 consecutive zero-critical-bug releases, and 2 passed FDA audits. I also use AI-assisted tooling (Claude Code, OpenCode, Antigravity) to accelerate coverage without losing rigor.

PROFESSIONAL EXPERIENCE

QA Engineer | Rubidex

Mexico City | February 2025 – May 2026

- Led QA strategy for 7 developers across 2 teams, building the testing approach and validation processes from scratch
- Drove the team to adopt unit testing as a habit, implementing it with Jest/Vitest and AI-assisted tooling (Claude Code, OpenCode, Antigravity) — 800+ automated tests
- Worked with a full testing toolkit across the stack (Playwright, SuperTest, Postman/Newman, Vitest, ESLint, Prettier)
- Set up CI/CD on GitHub Actions and used Vercel preview environments to validate frontend changes ahead of production
- Authored BDD scenarios (Gherkin), applied TDD to keep acceptance criteria executable, and introduced agile/change-control practices (Three Amigos, Design Handoffs, Definition of Ready) to protect sprint scope

Software Quality Engineer | AspenTech

Mexico City | March 2021 – July 2024

- Managed the test suite for pharmaceutical spectrometry software, prioritizing coverage across releases — 5 consecutive releases with zero critical bugs
- Passed 2 FDA audits and 3+ client audits with no critical observations; authored validation documentation under FDA 21 CFR Part 11 and ISO 9001
- Supported the automation team's regression automation (Ranorex, pytest, API request testing) while focusing on manual product testing of new features — audit-trail and operator-identity flows, and client-environment simulation with small Python scripts
- Gained deep Agile methodology and pipeline/test-suite management experience, collaborating closely with development on definition of done

Software Engineer | Infosys

Mexico City | July 2019 – February 2021

- Provided L2/L3 technical support to 5,000+ users of a Fortune 500 client, resolving issues in Oracle ERP Supply Chain with SQL, Java, and Python scripts

EDUCATION

- **Escuela Superior de Ingeniería Química e Industrias Extractivas (IPN)** — Mexico City · Bachelor's degree in Petroleum Chemical Engineering
- **Instituto Tecnológico de Buenos Aires (ITBA)** — Buenos Aires, Argentina · Exchange Program (Process Simulation and Optimization, Quality Management, Environmental Engineering)

CERTIFICATIONS & LICENSES

- Experience working under **ISO 9001:2015** standards · **Professional License (Cédula Profesional)** - Chemical Engineering, Number: 12075687

LANGUAGES

- **Spanish** - Native · **English** - Full Professional Proficiency

TECHNICAL SKILLS

Testing & QA
Jest, Playwright, Selenium, Vitest, SuperTest, Postman, Newman, BDD/TDD (Gherkin, Cucumber), Manual Testing, White-box Testing, Ranorex, pytest, API request testing

Programming
TypeScript, JavaScript, Python, SQL, Java, C++

Frontend & Backend
React, Next.js, Nest.js, Node.js

CI/CD & Deployment
GitHub Actions, Git, Azure DevOps, Vercel (deployment & preview environment best practices), Docker, Linux Environments, ESLint, Prettier

Project & Process
Jira, Confluence, Agile (Scrum)

AI & Automation
Claude Code, OpenCode, Gemini CLI, Antigravity, AI-assisted test automation, Report generation automation
